Vincent VOUGA

Senior Independent IT Consultant | Java & DevOps Specialist

📍 Brussels, Belgium 📞 +32 473 833 209 ✉️ vincent.vouga@gmail.com 🔗 LinkedIn 💻 GitHub

🇫🇷 French · 🇨🇭 Swiss | 🗣️ English (C2) · French (Native) · Spanish (B1)

23+ years delivering mission-critical systems in finance, defense, and EU institutions. Java architect with deep expertise in trading systems (FIX, OMS), DevOps/Cloud transformation, and AI integration. Proven track record leading teams and driving complex projects from design to production in high-stakes, regulated environments.

TECHNICAL SKILLS

BACKEND
Java 8→21, Spring Boot, Microservices, REST, WebSockets

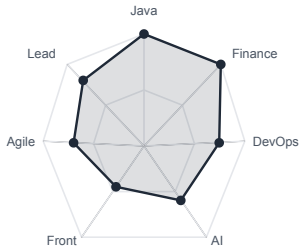
DEVOPS
Docker, Kubernetes, Terraform, AWS, Azure, GitHub Actions

DATA
Kafka, Spark, PostgreSQL, Oracle, MongoDB, Elasticsearch

TOOLS
Jenkins, Bamboo, Git, Jira, Maven, Nexus

AI
Generative AI, Agentic programming, Embeddings, Cursor

METHODS
Agile, SAFe, ITIL, Scrum (CSPO®)



🛰️ GOVERNMENT & DEFENSE (2022 – PRESENT) — 3+ YEARS

Senior Software Engineer — ILIAS Solutions (NATO Contractor)

May 2024 – Present
Brussels, Belgium

Advanced predictive logistics software for defense environments

- Backend development with Java 21 / Spring Boot across distributed microservices
- Multi-agent programming: autonomous planning & simulation flows
- AI-assisted development with Cursor to speed up prototyping, refactoring, and technical documentation
- Local LLM integration in Java (embeddings + lightweight inference for on-premise constraints)
- Data pipelines and processing with Kafka / Spark
- Containerized runtime with Docker Swarm, Linux; PostgreSQL persistence
- Targeted contributions to React/TypeScript (non-core UI scope)

`Java 21` `Spring Boot` `Kafka` `Spark` `PostgreSQL` `Docker Swarm` `Linux` `React/TS`

Application Engineer — Council of the European Union

Apr 2022 – Apr 2024
Brussels, Belgium

DevOps Middleware and Service Delivery Engineer (Independent Contractor)

- Application deployment, updates, releases, patches, configuration across Linux, Windows, AWS, Azure, Docker, Kubernetes
- Level 2 support, infrastructure decision support for development teams
- Maintenance/upgrade of SAP VMs and servers

- Automation and operational tooling (Bash / PowerShell)
- Runtime/platform operations: Tomcat, IIS; collaboration with delivery teams

`Kubernetes` `Docker` `Terraform` `AWS` `Azure` `Bamboo` `Tomcat` `PowerShell`

📈 FINANCE & TRADING CONSULTING (2006 – 2021) — 15 YEARS

Independent consultant via Smarfi-services / Open Group and direct assignments

Independent IT Consultant — Investment Banking & Asset Management

2006 – 2021
Paris & Brussels

Selected clients: BNP Paribas CIB & Dealing Services, Société Générale CIB, Crédit Agricole CIB, Candriam, ProCapital, Cream Consulting

- Delivered long-running consulting assignments in highly regulated front-office and middle-office environments.
- Combined software engineering, production support leadership, and release governance across trading systems.
- Worked end-to-end with traders, support teams, QA, and infrastructure teams in bilingual (EN/FR) environments.
- Maintained strong delivery quality under strict reliability, auditability, and operational continuity constraints.

`Java` `FIX 4.2/4.4` `OMS` `QuickFIX` `Oracle SQL` `Unix/Linux` `Jira` `CI/CD`

FIX Connectivity & Electronic Trading

BNP Paribas Dealing Services, Société Générale CIB, BNP Paribas CIB

- Led FIX certification campaigns and coordinated onboarding with brokers, FIX hubs, and execution venues.
- Improved order-routing reliability and interoperability between clients, gateways, and internal trading components.
- Contributed to regression and qualification cycles for trading tools before production releases.
- Supported end clients during certification phases, including troubleshooting and protocol-level analysis.

`FIX 4.2/4.4` `QuickFIX` `Oracle SQL` `Unix` `QA/Regression`

OMS & Trading Platform Engineering

BNP Paribas CIB, ProCapital, Société Générale CIB

- Developed and evolved OMS components for listed derivatives and equity workflows.
- Built and enhanced real-time processing chains, including message transformation and integration points.
- Delivered functional evolutions on client-facing and internal modules while preserving production stability.
- Worked on regulatory and traceability-oriented enhancements (archiving, audit, operational controls).

`Java` `OMS` `CORBA` `Tibco` `SonicMQ`

Run Leadership, Business Support & Service Quality

Candriam, BNP Paribas Dealing Services, Cream Consulting

- Owned L2/L3 support activities for business-critical applications used by traders and asset managers.
- Led bilingual teams and structured support processes (incident handling, escalation paths, operational KPIs).
- Supported investment desks directly and improved service quality through measurable operational governance.
- Contributed to service-transition and staffing proposals; coached junior consultants on SQL and log analysis.

`L2/L3 Support` `Sophis Fusion` `Charles River IMS` `KPI` `Service Delivery`

Architecture, Release & Delivery Governance

Crédit Agricole CIB, Société Générale CIB, Cream Consulting

- Acted as Java technical reference and interface between business owners, project teams, and delivery centers.
- Defined and applied technical standards, release processes, and environment management best practices.
- Contributed to migration and modernization efforts (WebSphere, monitoring, CI/CD discipline).
- Managed delivery quality in production-like environments with strong dependency and change-control constraints.

`Java` `WebSphere` `Maven` `Jenkins` `Jira`

Selected Client Mandates (Chronological)

- **2018 – 2021 | Cream Consulting (Brussels):** Technology leadership, backend CRM delivery (Java/Spring), monitoring, cloud operations, and team mentoring.
- **2016 – 2018 | Candriam (Paris/Brussels):** Lead business application support for asset management operations and trading-adjacent workflows.
- **2015 – 2016 | BNP Paribas Dealing Services (Paris):** FIX connectivity expert responsible for certifications and external platform coordination.
- **2014 – 2015 | Crédit Agricole CIB (Paris):** Java technical lead for cash-management platforms and engineering governance.
- **2013 – 2014 | Société Générale CIB (Paris):** Forex onboarding and release manager for FIX API integration.
- **2010 – 2013 | BNP Paribas CIB (Paris):** Java development engineer for listed derivatives OMS and order-routing flows.
- **2008 – 2010 | ProCapital (Paris):** Java software engineer on OMS evolutions, FIX messaging, and archiving initiatives.
- **2006 – 2008 | Société Générale CIB (Paris):** Java engineering for middle-office systems and enterprise integration.

`Banking IT Consulting` `Capital Markets` `Asset Management` `Production-Critical Systems`

🚀 STARTUPS & ENGINEERING (2000 – 2006) — 6 YEARS

via CapGemini then independent

Independent Developer — RAINET

Apr 2005 – Jun 2006
Paris

- Created Shiva, a management software suite for cybercafés and multimedia spaces
- Achieved ~40% market share in France
- Client-server architecture, security, licensing, customizable modules

`Delphi 5` `Interbase` `Windows`

Software Engineer — MOBIQUID (Hi-Media)

Jun 2004 – Mar 2005
Paris

- Developed online mobile services, including micropayment solutions (Mediapass/AlloPass)

`C++` `ASP` `SQL Server`

Java Software Engineer — COBA Technology

Feb 2002 – May 2004
Paris

- Startup environment: built a real-time trading platform for short-term swaps with automatic matching
- Led discussions with trading specialists, designed a prototype, developed real-time order matching

`Java 1.4` `Swing` `Sockets` `Oracle` `Tomcat`

Software Engineer — 9 Telecom (Cap Gemini)

Feb 2000 – Dec 2001
Paris

- Migration of fixed-line telephony services to the Internet; internal applications in C/C++ interfacing with BSCS

C | C++ | Windows | Unix

PERSONAL PROJECT

Full-Stack Game Application — Multi-Agent AI Development

Designed and orchestrated a multi-agent AI system to develop a large-scale application:

- Architected agent coordination: context summarization, task distribution, inter-agent communication protocols
- Backend: Java 21, Spring Boot 3.2, WebSocket/SSE — 950+ classes
- Performance: procedural map generation (2M+ tiles) in milliseconds using GraalVM native compilation
- Python SDK: simplified API access for offline/online modes
- Frontend: React 18, Three.js, TypeScript — 320+ files
- Mobile: React Native, Expo

Multi-Agent AI | Java 21 | GraalVM Native | Python SDK | React | Three.js

EDUCATION & CERTIFICATIONS

2019	Certified Scrum Product Owner® (CSPO®) Scrum Alliance, Belgium
1997–1999	Bachelor's Degree — Mathematics & Computer Science University of Rouen, France
1996–1997	DUT Software Engineering (Génie Logiciel) Université Le Havre Normandie
1995	Scientific Baccalauréat (Mathematics) Dieppe, France

INTERESTS

Philosophy, science, technology. Generative AI enthusiast. Secure coding practices.
