Vincent VOUGA

Senior Independent IT Consultant | Java & DevOps Specialist

📍 Brussels, Belgium 📞 +32 473 833 209 ✉️ vincent.vouga@gmail.com 🔗 LinkedIn 💻 GitHub

🇫🇷 French · 🇨🇭 Swiss | 🗣️ English (C2) · French (Native) · Spanish (B1)

23+ years delivering mission-critical systems in finance, defense, and EU institutions. Java architect with deep expertise in trading systems (FIX, OMS), DevOps/Cloud transformation, and AI integration. Proven track record leading teams and driving complex projects from design to production in high-stakes, regulated environments.

TECHNICAL SKILLS

BACKEND
Java 8→21, Spring Boot, Microservices, REST, WebSockets

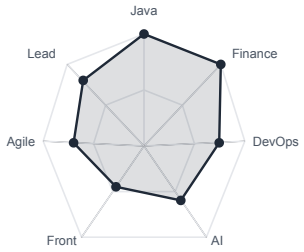
DEVOPS
Docker, Kubernetes, Terraform, AWS, Azure, GitHub Actions

DATA
Kafka, Spark, PostgreSQL, Oracle, MongoDB, Elasticsearch

TOOLS
Jenkins, Bamboo, Git, Jira, Maven, Nexus

AI
Generative AI, Agentic programming, Embeddings, Cursor

METHODS
Agile, SAFe, ITIL, Scrum (CSPO®)



🛰️ GOVERNMENT & DEFENSE (2022 – PRESENT) — 3+ YEARS

Senior Software Engineer — ILIAS Solutions (NATO Contractor)

May 2024 – Present
Brussels, Belgium

Advanced predictive logistics software for defense environments

- Backend development with Java 21 / Spring Boot in distributed microservice environments
- Multi-agent programming: autonomous planning & simulation flows
- Integration with Cursa (internal engine for orchestrating advanced business/agent flows)
- Local LLM integration in Java (embeddings + lightweight local inference under on-prem constraints)
- Data pipelines and processing with Kafka / Spark
- Containerized runtime with Docker Swarm, Linux; PostgreSQL persistence
- Targeted contributions to React/TypeScript (not UI-core)

`Java 21` `Spring Boot` `Kafka` `Spark` `PostgreSQL` `Docker Swarm` `Linux` `React/TS`

Application Engineer — Council of the European Union

Apr 2022 – Apr 2024
Brussels, Belgium

DevOps Middleware and Service Delivery Engineer (Independent Contractor)

- Application deployment, updates, releases, patches, configuration across Linux, Windows, AWS, Azure, Docker, Kubernetes
- Level 2 support, infrastructure decision support for development teams
- Maintenance/upgrade of SAP VMs and servers

- Automation and operational tooling (Bash / PowerShell)
- Runtime/platform operations: Tomcat, IIS; collaboration with delivery teams

`Kubernetes` `Docker` `Terraform` `AWS` `Azure` `Bamboo` `Tomcat` `PowerShell`

📈 FINANCE & TRADING (2006 – 2021) — 15 YEARS

via Smarfi-services / Open Group — IT Consultant Specializing in Finance

Technology Leader — Cream Consulting

Dec 2018 – Nov 2021
Brussels

- Led backend development and built a CRM with Java 8, integrating REST APIs, MongoDB, Elasticsearch
- Mentored a junior developer for front-end tasks (React); maintained focus on backend delivery
- Implemented Zabbix monitoring; managed IT infrastructure enabling secure remote work
- Agile/Scrum delivery with Jira; maintained CI/CD pipeline and production quality standards
- Managed AWS EC2 instances; defined KPIs; administered Jira/Confluence
- Hands-on development on a Chrome add-on (JavaScript) and NodeJS scripts

`Java 8` `SparkJava` `Spring Boot` `MongoDB` `Elasticsearch` `OAuth2` `React` `AWS EC2`

Lead Business Application Support — Candriam

Dec 2016 – Nov 2018
Paris & Brussels

- Managed Level 2 & 3 business support for an asset manager overseeing €100B AUM
- Led a bilingual team (EN/FR) of five across Paris and Brussels
- Incident management, KPI tracking, and direct support to trading desks and fund managers
- Assisted and won a service bid for a hybrid finance/IT support team; trained juniors (SQL, log analysis, order flow)

`Sophis Fusion` `Charles River IMS` `GPMS` `Oracle` `Java 8`

FIX Connectivity Expert — BNP Paribas Dealing Services

Sep 2015 – Aug 2016
Paris

- Oversaw FIX protocol certifications and coordinated with brokers, FIX networks, and platforms
- Managed a team of three in a bilingual setting; developed support procedures
- Conducted QA and regression testing on trading tools

`FIX 4.2/4.4` `Oracle SQL` `Unix` `QA/Regression`

Java Technical Lead — Crédit Agricole CIB

Jul 2014 – Jun 2015
Paris

- Technical reference for Java within a service center developing cash management solutions
- Produced technical documentation and standards; facilitated interface between project owners and dev center
- Contributed to WebSphere migration strategy; participated in spec and technical review meetings

`Java` `WebSphere` `MQ` `Maven` `Jenkins` `Spring`

Forex Onboarding & Release Manager — Société Générale CIB

Jul 2013 – Jun 2014
Paris

- Managed platforms for testing and client integration (onboarding) for SG CIB FIX APIs (Forex)
- Release & environments management; monitoring integration; KPI analysis for capacity planning

Java | Tibco | RMDS | Verifix

Java Development Engineer — BNP Paribas CIB

Jun 2010 – May 2013
Paris

- Participated in the development of a FIX order router for BNP Paribas brokerage services (listed derivatives OMS)
- Led cross-functional studies to ensure compatibility across processing chains
- Contributed to technical & business improvements; performed FIX certifications with external clients

Java 5 | FIX | QuickFIX | Oracle | Tibco | CORBA

Java Software Engineer — ProCapital

Jul 2008 – Jun 2010
Paris

- Developed features for ProCapital's OMS (SPTrade), deployed to clients for stock market access services
- GUI modifications, FIX message enhancements, and design of a regulatory-compliant data archiving project

Java | Oracle | Eclipse RCP | FIX | SonicMQ

Java Engineer — Société Générale CIB

Jul 2006 – Jun 2008
Paris

- Developed Java services for an equity-derivatives middle-office repository (Eliot)
- Integrated with surrounding systems using CORBA; maintained and evolved EnorM notification application

Java | CORBA | Sybase | Unix | Tibco

🚀 STARTUPS & ENGINEERING (2000 – 2006) — 6 YEARS

via CapGemini then independent

Independent Developer — RAINET

Apr 2005 – Jun 2006
Paris

- Created Shiva, a management software for cybercafés & multimedia spaces
- Achieved ~40% market share in France
- Client-server architecture, security, licensing, customizable modules

Delphi 5 | Interbase | Windows

Software Engineer — MOBIQUID (Hi-Media)

Jun 2004 – Mar 2005
Paris

- Developed online services for mobiles, including micro-payment services (Mediapass/AlloPass)

C++ | ASP | SQL Server

Java Software Engineer — COBA Technology

Feb 2002 – May 2004
Paris

- Startup environment: built a real-time trading platform for short-term swaps with automatic matching
- Led discussions with trading specialists, designed a prototype, developed real-time order matching

Java 1.4 | Swing | Sockets | Oracle | Tomcat

Software Engineer — 9 Telecom (Cap Gemini)

Feb 2000 – Dec 2001
Paris

- Migration of fixed-line telephony services to the Internet; internal applications in C/C++ interfacing with BSCS

C | C++ | Windows | Unix

PERSONAL PROJECT

Full-Stack Game Application — Multi-Agent AI Development

Designed and orchestrated a multi-agent AI system to develop a large-scale application:

- Architected agent coordination: context summarization, task distribution, inter-agent communication protocols
- Backend: Java 21, Spring Boot 3.2, WebSocket/SSE — 950+ classes
- Performance: procedural map generation (2M+ tiles) in milliseconds using GraalVM native compilation
- Python SDK: simplified API access for offline/online modes
- Frontend: React 18, Three.js, TypeScript — 320+ files
- Mobile: React Native, Expo

Multi-Agent AI | Java 21 | GraalVM Native | Python SDK | React | Three.js

EDUCATION & CERTIFICATIONS

2019	Certified Scrum Product Owner® (CSPO®) Scrum Alliance, Belgium
1997–1999	Bachelor's Degree — Mathematics & Computer Science University of Rouen, France
1996–1997	DUT Software Engineering (Génie Logiciel) Université Le Havre Normandie
1995	Scientific Baccalauréat (Mathematics) Dieppe, France

INTERESTS

Philosophy, science, technology. Generative AI enthusiast. Secure coding practices.
